

The fascinating differences in the way we use our smartphones

Mohammed Topiwalla
Abraham Chandy
Patricia Londono
Fernanda De Oliveira Guimaraes
Hani Nabulsi

Project Objective

Our purpose is to provide insights for mobile phone stakeholders to help them target the right group of customers for new phone launches by helping them understand customer preferences and usage characteristics.

Methodology

- ▶ A survey of 18 questions was sent to various people across the globe. Link to survey is [here](#)
- ▶ 110 responses were received
- ▶ The complete project sits [here](#)

Analysis

- ▶ Data cleaning was performed in python
 - ▶ Standardize for grammatical consistency
 - ▶ Correct column placements and addition of ID column
- ▶ Exploratory data analysis
 - ▶ Using power BI
 - ▶ Descriptive statistics in SAS

- ▶ Clustering
 - ▶ Variables in question 10
 - ▶ Checking perception bias
 - ▶ Standardizing variables
 - ▶ Principal component analysis
 - ▶ Clustering on new standardized variables
 - ▶ Clustering on first 4 components from PCA
- ▶ Clustering Interpretation
 - ▶ T Test
 - ▶ Explanatory analysis

Cluster Summary

Cluster 1

- ▶ 26 – 35
- ▶ Main use - surfing
- ▶ Love the Iphone
- ▶ WhatsApp

Cluster 2

- 36 - 45
- Main use – calling, surfing
- Prefer Samsung
- WhatsApp

Cluster 3

- 15 - 25
- Main use – texting, social media
- Iphone then Samsung
- WhatsApp

Cluster 4

- 46 - 60
- Main use – social media
- Prefer Samsung
- Skype, WhatsApp
